“Snapshot of Life: 1930 Along Boston Turnpike (Route 9)”

Background: Original negatives are in the possession of historian Frank Morrill, Charlton, MA. who acquired them while cleaning out a building on Front Street, Worcester. In the past, negatives were scanned and provided to historian Michael Perna by Frank Morrill. Michael has done a Shrewsbury Historical Society presentation on the images and has also included many in his book “Shrewsbury Through Time II”. Permission was obtained from Frank by Paul Brueggemann after a visit to his home on 4/6/2024 to use the photos in any way deemed fit. Explicit permission was granted after telling him I would work with SHS to put them on their website. I physically viewed all the negatives that Frank had in a notebook marked “Shrewsbury”.

The images are a collection obtained by the state to do land takings for Route 9/Boston Turnpike improvements. All are from the 1930s. The research included in this document is unique and was completed by Paul Brueggemann in 2024. There are 104 images in the collection.

Acknowledgements: Frank Morrill for lending the images and Justin Dobson, Shrewsbury Assistant Town Manager for finding town plans that aligned land parcels with locations.

The following article excerpt in the July 11, 1930, Worcester Telegram title "Shrewsbury Land Taken to Prepare for Worcester to Boston Turnpike" explains why the photographs were taken:

ALL IN READINESS FOR BEGINNING ROAD WORK

Construction on First 12-Mile Stretch Now Waits Letting of Contracts—Properties Already Acquired in Three Other Towns

All is in readiness for the contractors to step in and start work on the first 12-mile stretch of the Worcester and Boston turnpike, which when completed will be one of the most modern highways in the country. Yesterday the final decrees for land takings in Shrewsbury were filed by the county commissioners, and as soon as the contracts are awarded for the laying of the highway, actual work of construction can begin.

Previous land takings for the wider turnpike have been made in the other three towns through which the road will pass, Westboro, Northboro and Southboro. The largest number of takings were recorded in Shrewsbury, where many buildings on the northeast side of the road will be set back. Provisions have been made in the takings for a 120-foot highway, and where the amount of land at the rear of buildings was insufficient to provide for moving back the structures, additional takings were made at the rear of these plots.

No Completions This Year
The stretch of the highway from Lake Quinsigamond to the intersection of the present Boston and Wor-

cester road will probably not be torn up this year because of the large influx of visitors passing through. The buildings, however, will be moved so that construction can start as soon as it is deemed advisable.

In no instance is it expected that work will be completed on any section this year, although the subgrade is expected to be laid and allowed to settle over the winter. The contracts will probably be awarded in three sections, in that the lowest bids for the three, opened recently in the office of the Department of Public Works, totalled less than the lowest bid for the entire 12-mile stretch.

The engineering department of the county is completing detailed plans of the various intersections and the under and over-passes which will span the road. Specifications of the stretches in the various towns have been completed and copies will be forwarded to the town clerks.
